

waph-mohamaz

WAPH-Web Application Programming and Hacking

Instructor: Dr. Phu Phung

Student—

Name: Afroz Mohammad

Email: mohamaz@mail.uc.edu

Short-bio: Afroz Mohammad has keen interests in software development.

Lab 0 - Development Environment Setup

Part I - Ubuntu Virtual Machine & Software Installation

First I clicked on the link: sandbox02.cech.uc.edu/vcac and then signed in with my UC Credentials. After login in I requested to create a new virtual machine which was under the course name : Web App Programming and Hacking. After submitting the request , I saw Ubuntu image and gave machine name to my username which is mohamaz-VM. After successfully deploying the Ubuntu Image, I accessed it in the deployment tab (settings-> Connect to Remote Console).

Apache Web Server Testing

Part II - git Repositories and Exercises
